PROFESSIONAL SUMMARY

Dynamic Electronics and Communication Engineering student with a strong foundation in full-stack web development, IoT systems, and database-driven applications. Demonstrated technical leadership through successfully completing three responsive website projects and driving two ongoing developments. Skilled in bridging hardware and software, leveraging Python, JavaScript, React, MySQL, and ESP32 to execute innovation-focused projects.

SKILLS

- **Programming & Scripting:** Python, C, C++, JavaScript, HTML5, CSS3.
- **Frameworks & Technologies:** React, MySQL, REST API, Git, GitHub.
- **Hardware & IoT:** ESP32, IoT applications, Embedded Systems.
- **Design Tools:** UI/UX Design, MATLAB, Logo & Graphic Design (including visual branding assets for organizational chapters and community groups).
- **Core Competencies:** Problem Solving, Leadership, Communication, Organizational Skills.

EDUCATION

B.Tech in Electronics & Communication Engineering

Expected Graduation: May 2027

MBC CET, APJ Abdul Kalam Technological University

EXPERIENCE

Helios MBC CET IEDC Student Lead | Kerala Startup Mission (KSUM)

03/2025 – Present

- Spearhead innovation and entrepreneurship activities while coordinating key technical events.
- Support startup-focused initiatives, fostering a culture of innovation among the student body.

μLearn Leadership Team (Campus, District & Zonal Lead Intern)

01/2026 – Present

- Facilitate comprehensive peer-learning opportunities and community engagement programs across regional networks.
- Spearheaded technical community events, including engineering an application for a QR code-based treasure hunt during the "mu onam" program.
- Support and expand regional initiatives, successfully reaching and impacting over 200 students.
- Assist in regional community growth, mentorship coordination, and technical networking activities.

Freelance Web Developer

01/2024 – Present

- Successfully delivered three complete, cross-platform website projects.

- Currently engineering two additional websites with robust backend integration and seamless database connectivity.

PROJECTS

Urban Flood & Drainage Block Detector (B.Tech Mini-Project)

- Engineered an advanced IoT-based monitoring system utilizing ESP32 microcontrollers and Python.
- Designed the hardware-software architecture for real-time flood detection and precise drainage blockage identification.

NASA Space Apps Challenge Web Application

- Collaborated within a 6-member team to design an innovative web application for air quality forecasting to address critical Earth and space-related challenges.

Business & Institutional Web Platforms

- **Arackamannil Printers Management System:** Built a responsive business website featuring backend integration, database support, and automated customer inquiry handling.
- **Bethany High School:** Developed a comprehensive institutional platform with database connectivity for streamlined information management.
- **Arackamannil Farms:** Designed a responsive website optimizing digital presence and accessibility across desktop and mobile devices.

LEADERSHIP & ACHIEVEMENTS

- **Global Nominee:** NASA Space Apps Challenge (2025).
- **Branding & Marketing Lead:** KSUM IEDC (2024–25).
- **Event Coordinator:** Successfully supported and organized 5 major innovation and technical events.

CERTIFICATIONS & INTERESTS

- **Certifications:** Microsoft Fundamentals of UI/UX Design (Coursera), NPTEL Elite - Joy of Computing Using Python (70%).
- **Interests:** Web Development, IoT Systems, Open Source Technology, Angular, Innovation & Entrepreneurship.
